Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1837 Excerpt: . Sun, lith month 30th, 1834, made at Haverford School, Latitude 40 V 12 North. By J. Gummere, Professor of Natural Philosophy and Mathematics. h. m. sec. Beginning, 0 59 12 End, 3 36 53 The state and rate of the clock were determined by a number of observations of the sun s meridian passage, including one on the day of the eclipse: the state of the transit instrument, a twenty inch one by Dollond, being carefully examined by observed transits of high and low stars. The observations of the eclipse were made with a forty-six inch achromatic by Tully and Sons, just received. It has four astronomical eye pieces, but was not accompanied by a statement of their powers, and I have not yet had leisure to ascertain them. The lowest was used; it is probably about forty. At the time of commencement part of...
