

Higher Mathematics (general higher education on the National Eleventh Five-Year planning materials)

Filesize: 4.47 MB

Reviews

Great e book and beneficial one. It is amongst the most awesome pdf i actually have read through. You wont feel monotony at at any time of your own time (that's what catalogs are for relating to if you request me).

(Dorothy Daugherty)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 407 Publisher: Higher Education Pub. Date :2008-04-01 version 2. This book points on the two volumes published. the book mainly includes functions. limits. continuity of functions. function of one variable differential calculus and its application. a unary function calculus and its applications; the next volume of the main contents include vector algebra and analytic geometry of space. multi-function differential calculus and its applications. re-integration and its applications. the curve integral and surface integral. infinite series. ordinary differential equations . End of the book is accompanied by mathematical experiments. several commonly used around the curve and the common surface of the three-dimensional graphics. points table. exercises the answers. This book aims to learn the basics of mathematics and mathematical thinking to strengthen the quality of the training integration. focusing on geometric visual representation of mathematical concepts. illustrations. structured. thorough reasoning. easy to understand. The book selected examples. exercises wide coverage. with strong representation. This book can be used as science and engineering colleges of higher professional undergraduate teaching. and learning reference for engineering and technical personnel. Contents: Chapter functions. limits. and the function of a continuous map section. set and map two. three function concept. characteristics of four types of functions. inverse functions and composite functions five or six elementary functions. for example the establishment of a function of Problem 1 .1 Section II series limit of one series and the simple nature of the two. the limit of three series. monotonous exercises bounded criteria Section 1.2 the limit of a function. the independent variable tends to infinity the limit of two functions. variables tend to limited limit of three function values. function limits the nature of the...
