By Independent Scientific Advisory Board

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Original publisher: Portland, Or. : Independent Scientific Advisory Board for the Northest Power Planning Council and the National Marine Fisheries Service, 2001 OCLC Number: (OCoLC)223433461 Subject: Fish habitat improvement -- Columbia River Watershed. Excerpt: . . . ISAB 2001-6 Biological Objectives Review 4. Increase energy and nutrient connections within the system to increase productivity and expand biological communities. This objective stresses the importance of natural nutrient pathways to the maintenance of aquatic and riparian productivity. A bullet explicitly recognizing the importance of salmon carcasses as nutrient sources for a variety of fish, wildlife, and plants would be helpful. Another bullet stating the importance of periodic inundation of floodplains for normal nutrient cycles would be useful. 5. Allow for biological diversity to increase among and within populations and species to increase ecological resilience to environmental variability. Expand the complexity and range of habitats to allow for greater life history and between species diversity. Manage human activities to minimize artificial selection or limitation of life history traits. Restoring habitat and access to habitat that establishes life history diversity is a priority. This objective provides general support for restoring...
